PVC Money Chief

Turn Design Into Profit

GET THE GUIDE

Want to make realistic income per month?

You've come to the right place! It's not realistic to make \$1000 per month with an eBook isn't realistic, or if it was, it would take months of effort to reach that far. We are tired to see fake, overused, same old methods again and again. With PVC Money Chief, we are realistic, not dreamers. We are here to make money!

FEATURES

Designed for Everyone

Free Updates

I always check my method so that it is consistently providing the quality results to my customers! I want to make my method affordable for everyone to see, I've been in the same situation as you and want to make something! With my package under \$30, I believe that my pricing is affordable for everyone to purchase and make some money!

This is a method I've been using for a few months now, it's totally legit and copyright free but could be used for less legit things as well.

I'm gonna drop so many hidden gems in this method. It has a few working parts but the end product can be adapted to whatever you desire.

Things you'll need:

1. An IOS or Android Phone of decent quality (Currently using Samsung Galaxy S9 Plus)
2. Pro version of the app Paintt - 9\$/year (Not affiliated, just the best design app I found for androids). Paintt turns your photos into masterpieces, for real! Use the most advanced AI tech to dramatically improve your art with tons of fully customizable HD filters.

3. A Desktop Computer
4. Gmail account
5. Photoshop - whatever version (Best if you have access to actions)

Here we go:

1. Go to Pixabay or Wiki Commons on your phone and find public domain images or CC of the niche you want. This method works mainly with real images, not vectors as much. Download these Images on your phone.
2. Open up the Paintnt app, make sure to get the pro verison unless you want extra work photoshopping out their trademark. Now, pick your image and look at the different filters that you see. Crop what you want in the image and then add the filter, mess with settings if needed. Each Filter turns the image into a work of art and is also much easier to size being that it is now a painting or cartoon. I've had even low quality images work well.
3. This part is about where to place your design. They are many places this can work for, here are a few I've begin going hard on.

Redbubble

BUY OR SELL EARNING METHODS

These designs are perfect for many products on this platform, create an account and resize your image to 5400 x 4500. If you're not scared, Look up "Imacros reddit" for this site, it will make life easier. Beware though, I've had several accounts banned for automation so I've stopped doing this. Accounts I have still make decent amounts.

Createspace

This one I have just started but this requires a bit more effort,

1. First, do some research and find the perfect sized book for your niche.
2. Open the File in photoshop
3. Stretch your main image into the front cover section
4. Add a big rectangle for the back cover, make the rectangle a color that complements the cover
5. Make sure the template is sized correctly with your main image and back cover.

6. Add title on the spine or front cover (Required by Createspace, to save you days of annoyance, make sure that the title on the book is what your title of the book will be listed as, otherwise, they won't greenlight it)

6. Save As Photoshop PDF (Name it something Organized)

7. Upload Your PDF Cover Image and the interior.

(Do your research for keywords and titles, it isn't that hard and is similar to any onsite SEO, I use Etsy rank and Merchantwords to find good ideas, but don't over think it)

8. Rinse and Repeat till your eyeballs bleed.

Tip. Use photoshop actions and record how you size it and place everything, use youtube to learn it, it will save time on bulk projects. I've made 10,000s of designs in days rather than months using this photoshop method alone.

Also for anyone wondering about the interior, journals make great gifts, use google slides to make the interior.

- Ways to improve: Find a way to auto-populate CreateSpace titles, description, keywords. Also using google drive and sheets to keep all designs, original images, covers and listing info all organized.

FineArtAmerica

fineartamerica

This one requires a \$30/year subscription, but it's a good print on demand company that goes for a more artistic approach. Pretty self explanatory, use the same methods from redbubble.

Printful

This will open up some doors to a lot of different things, they are a print on demand company, they have a lot of products perfect for this type of design or image. The best part, it gives access to Amazon, Etsy, and Ebay Integration.

Honestly, I make enough right now to live off it that's for sure hahah

I make about \$2000-4000/ month from redbubble on average - I have about 5k designs on there, each on 35+ Products. I make random but consistent sales.

\$800 -1300/ month on merch by Amazon on average - Just got to Tier 1000 so I'm planning to hit this black Friday hard.

Just started Createspace, so time will tell.

\$200-400 on Etsy a month

This would be higher but most just require more effort. My only weakness in this whole journey is that if I focused more on niches, and get my designs out there, I will make much more. Keep an eye on Etsy. If you can make a great niche store, promoting it with paid ads is cheaper than anywhere else for traffic. I make \$11 commission on shirts uploaded that I couldn't get sales for on merch by Amazon.

Extra tip, run an android emulator on your computer and download the apk for Painnt.

Painnt is also available for your Windows Desktop:
